## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-11, drawn to competitive binding assay method.

Group II, claims 12-24, drawn to enzyme assay method.

Group III, claim 25, drawn to enzyme inhibition assay method.

The inventions listed as Groups I, II, III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: in Group I, a labeled Reactant 3 and unknown amount of Reactant 2 competitively bind Reactant 1 coated in a vessel to obtain a signal that provides a direct proportional relationship between the label signal and the concentration of Reactant 2; in Group II, bioactivity of Reactant 2 is measured by its hydrolysis of the substrate of labeled Reactant 1 wherein a change of signal obtained therefrom provides a direct proportional relationship to the amount of bioactivity of Reactant 2; and in Group III, bioactivity of Reactant 2 is measured by inhibition of unknown amount of an inhibitor to its hydrolysis of the substrate of labeled Reactant 1 wherein a change of label signal obtained in the interaction between the three components provides an inverse proportional relationship to the amount of the inhibitor.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
